How to Count Countries Worked: A New DX Scoring System

By Clinton B. DeSoto
Assistant to the Secretary, A.R.R.L.

Reprint of article from October 1935 QST

This piece has been started half a dozen times in the past five years. It has been the subject of more celebration and contemplation and tabulation and plain downright misery than one cares to recall. It is presented now - in a form far from what we should like it to be - only to silence the insistent demand that has come down through the years. "How about a list of countries of the world?" "How do I count countries worked?" "Are Tasmania and Australia separate countries?"-and a hundred variations of this latter. With the world WACing at a terrific rate these days, faster by far than ever before, the number of countries worked is increasingly becoming the criterion of excellence among outstanding DX stations.

IL DXCC ...MA...?

NO ELECTRONIC LOG

Please note I do not upload logs electronically. The reason for this is because requests were coming in for uploads to too many different QSL systems, for example LOTW, EQSL, QRZ, Clublog and so on. There is always a huge amount of email requests associated with log uploads and my hobby is amateur radio, not email, so I have decided **I will not upload to any systems** to avoid this increasing problem. I do apologise having come to this decision.

BLACKLISTED

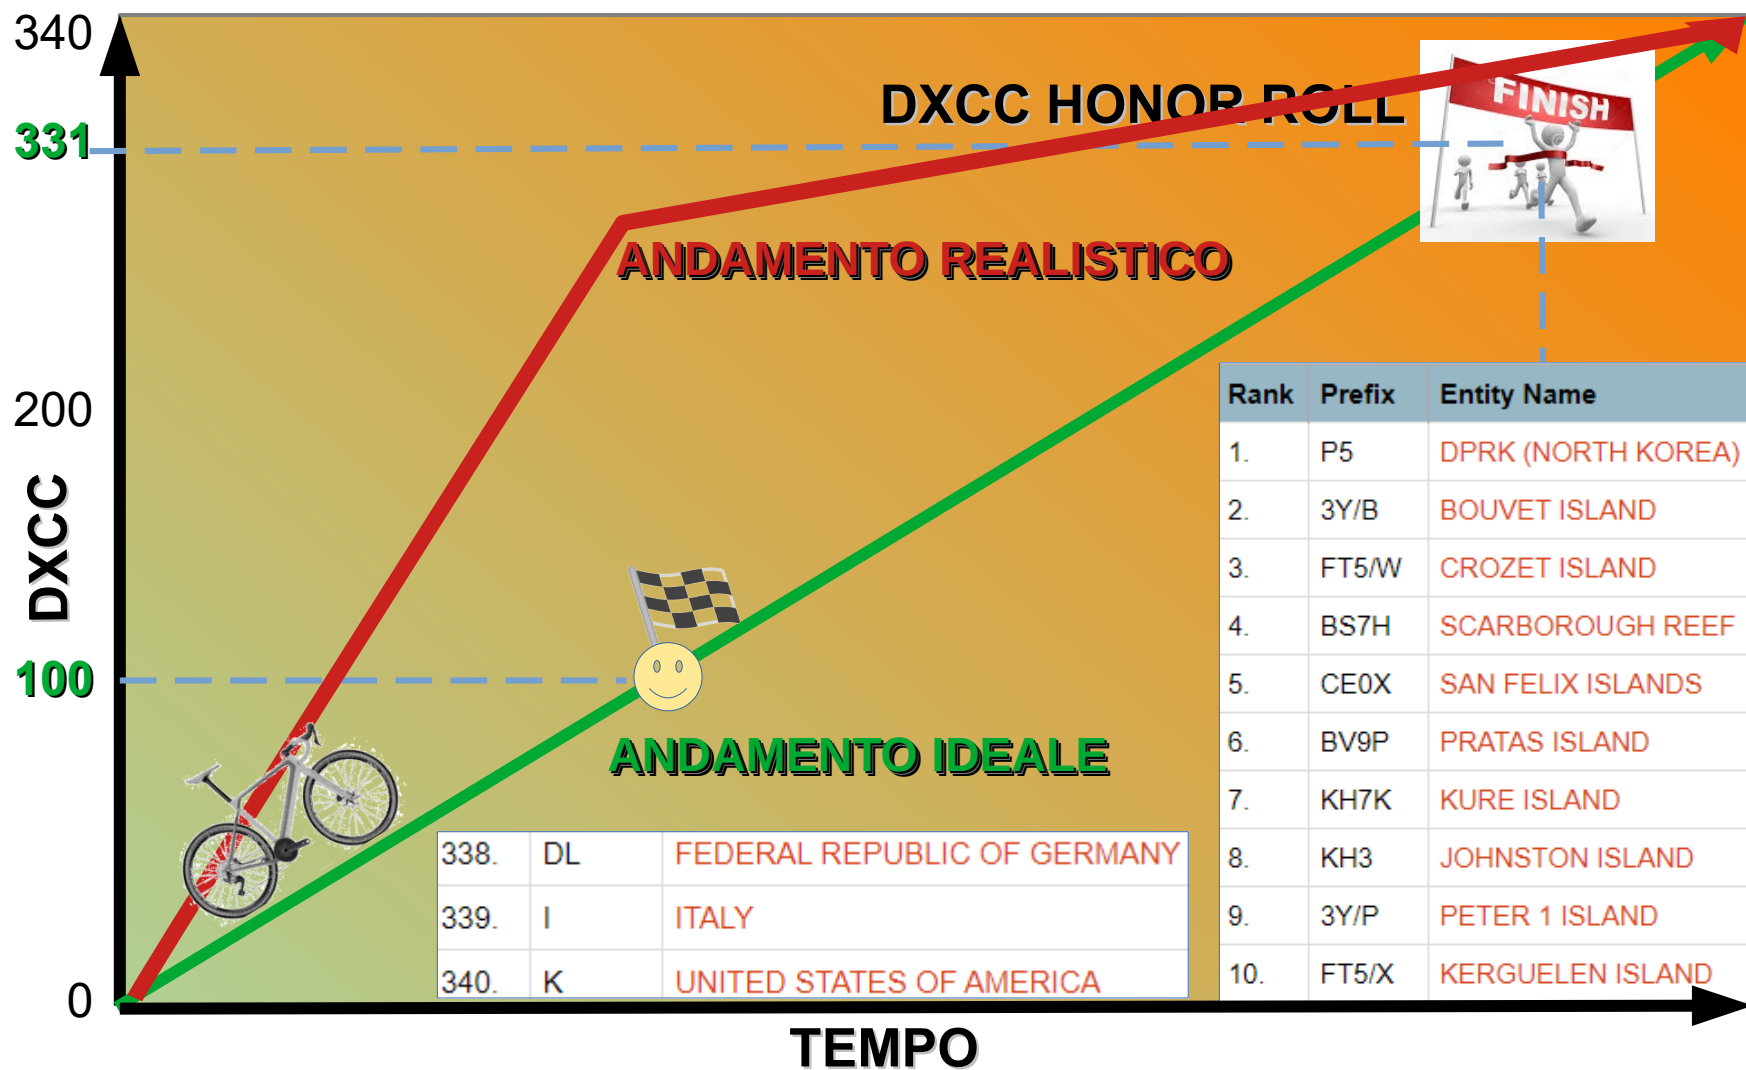

Thanks to those who continue to request a QSO who also operate considerably.... BUT.....The QRM makers out of Europe are still a massive problem. **Italian, Spanish and Russian (including former Eastern Block) being the ones that are the most inconsiderate, BUT the main culprits are Italian operators who have NO respect and a bad operating etiquette.** I must qualify this statement: NOT ALL. Thanks to those from these countries who operate considerably and who have emailed me to condemn their own countrymen for bad radio etiquette. In many cases the guilty cannot even hear ZS8M, but they jump on the frequency and add to the chaos. **I have blacklisted 15XXX** for being inconsiderate and creating unnecessary QRM. I state again; it isn't just Italians (NOT ALL), but rogue operators from other European countries as well.
